Combi-Line

Design your ceiling

Combi-Line is an unique **innovative design** system that opens up the possibilities for architects. The system's carrier rail is fitted with a variety of clips that fit a mix of **metal, wood** grill and **HeartFelt®** panels, enabling the three different materials to be fitted on to a single carrier.

Endless **combinations** are possible: ceilings with ruptured **lines**, random **patterns** - Play, Pause and Repeat - and open positions in the grid, non-standard **modulation** and the opportunity to **mix** and match ceiling panels of different **materials**.

Four **colour** combination proposals corresponding to four completely different **styles**, each with its own and **unique** colour and **atmosphere** image. The colour and material selections are relatively large, and that is not without reason. We like to **inspire** the architect and leave enough space for **creativity**. Each style group consists of a selection of materials, clarifying an atmosphere **mood** board and an example of a matching space where the product could be applied.

Let yourself be inspired by the **endless possibilities** there are with Combi-Line and **design your ceiling** the way you always wanted.
