Invite nature inside

and create a sound absorptive wall with 100% natural mummy-moss!

The new decorative solution to improve room acoustics; the Quiet Interiors GREENWALL with 100 % natural moss covering which creates a seamless and high quality sound absorptive wall that will give your room an exclusive design. This Green Wall will keep it's striking appearance, is virtually maintenance free and needs no water or daylight!

Pleasant room acoustics not only improve the sound experience in a room, they are crucial for health and wellbeing! The call for natural green products is getting louder every day. Research has shown that natural greenery in an office boosts productivity of employees, improve people's mood and reduces sick days!. It even influences our taste, which makes it an excellent addition to the interior design of restaurants.

This solution is custom made so it can be produced in any sized panels to create a seamless wall. It can also be delivered in decorative (sound absorptive) room dividers, flower pots or as "paintings" in any desired size, with or without luxury frame. All panels are hand made which makes each and every piece fully unique!

The Green Wall is suitable for almost all indoor applications, including hotels, lounge room, foyers, reception areas, conference rooms, art galleries, conference rooms, showrooms, shops, airports, restaurants, offices etc. The moss wall will impress with its outstanding acoustic capabilities and a is stunning visual point.

The impressive sound absorption performance is achieved by the use of high quality cotton fibre backing board, made of recycled jeans with the supporting board made of recycled pvc. In fact, the whole panel is made of organic and/or recycled material. Acoustic performance reports are available upon request.

The unique factor about this moss solution lies in the fact that it has not been coloured with chemicals but instead has been preserved with a 100% natural substance. These factors make the Green Wall a fully sustainable solution, not only "green" in colour but "green" in every sense!

Quiet Interiors works together with Soundless Acoustics in the Netherlands to develop sustainable, decorative acoustic solutions to improve room acoustics, absorb excess noise and reduce reverberation time, thus improving speech intelligibility and sound experience in any room.

Both Soundless Acoustics and Quiet Interiors put great emphasis on health and wellbeing with philosophy that acoustic solutions should consist of sustainable and organic materials that positively contribute to both a healthy environment and a perfect room experience.
